Chart Detail

Subjective:

Spay, Nail Trim, Rabies, 4Dx Test, OWN Microchip, Single Nexgard, Single Interceptor Plus.

Objective:

Mucous membranes pink and moist. CRT-Q, EEN normal. No periodontal disease. HL sounds normal. Abdominal palpation normal. LN palpation normal. Dry haircoat diffusely. There is moderate hair loss symmetrically on the lateral thighs and dorsal tail base, suspected to be from FAD. MS system normal. Anus and external genitalia normal. Mentation normal. BCS 4.5/9

Assessment:

Hair loss dorsal tail and lateral thighs, suspected FAD.

Plan/Procedure:

- Rescue/Shelter Canine Spay

The P was premedicated and anesthesia induced per Anesthetic Record. P was maintained on ISO per Anesthetic Record. Sterile prep performed. Routine spay performed via midline incision. Two encircling ligatures placed around pedicles and uterine body with 0 chromic gut. The muscle layer was closed with monocril simple interrupted. The SC layer was closed with monocril simple continuous. Skin was closed with monocril intradermal. Post op meds per Anesthesia Record. Recovery was uneventful.

- Rabies Vaccine First Dose
- Nail Trim with Sandox

- SNAP 4Dx Test NEGATIVE
