Annie & Louisa

Friday, August 18, 2017 -

Begin exercise restriction
Your dog has 4 prescriptions to begin today -
Benadryl and Advantage-Multi are today only
Prednisone and Doxycycline are for 1 month

Please give them according to the following schedule:

Give Benadryl and first dose of Prednisone 1 hour before first dose of Doxycycline and applying Advantage-Multi

Give first dose of Doxycycline and apply Advantage-Multi 1 hour after Benadryl and first dose of Prednisone

Saturday, September 16, 2017 - Give Interceptor Plus

Monday October 16, 2017 -

Decrease activity level further: Cage restriction/on leash in yard
Drop off at office THVS between 8:00-8:30am
Your dog will get Interceptor Plus and their 1st Immiticide injection
We will call you when they are ready to pick up in the afternoon
They will come home with 1 month of Prednisone

Wednesday, Nov. 15, 2017 -

Drop off at THVS office between 8:00-8:30am
Your dog will get Interceptor Plus and their 2nd Immiticide injection
They will spend the night at THVS

Thursday, Nov 16, 2017 -

Your dog will get their 3rd Immiticide injection
We will call you when they are ready to pick up in the afternoon
They will come home with 1 month of Prednisone
Continue exercise restriction for 8 weeks

Monday, December 18, 2017 -

Office appointment (brief) - please schedule a time
We will draw blood to look under the microscope for microfilaria
Your dog will be sent home with 6 months of heartworm prevention
Remember - still 4 more weeks of exercise restriction

Mid May 2018 -

Antigen test and re-fill heartworm prevention
